

# Low Voltage Smoke Venting Motors

**ABB**

# New motor range for smoke venting applications

Many solutions for fire protection require smoke-venting fans to move the smoke gases out into the open air. Dual-purpose concept is often used, meaning that the fans can also be used during normal working conditions for standard ventilation.

Smoke venting fans are used in stairwells, shopping malls, public buildings, tunnels, industrial buildings, enclosed car parks and other locations to mitigate the development of a fire. They create smoke-free areas to help with the rescue of people and with fire fighting. They also reduce the spread of smoke and fire to other parts of the building as well as to other buildings and, ultimately, reduce the risk of building collapse.

## Application principle

Hot smoke gases rising to the ceiling are evacuated by the fans, while fresh air is replenished further down, creating an area free from smoke at the floor level. Smoke venting fans can also be used for creating differential pressure between areas of a building, to prevent smoke from spreading between them.

Smoke venting fans and the motors driving them are designed to cope with the high temperatures that develop during a fire. Special type of bearings fitted with high temperature grease are used. The motors must be connected using heat resistant cable classified for the appropriate temperature and time.

Smoke venting fans can be placed in the ventilation duct, inside the room that is being protected, or outside the room to push cool air into the room during a fire. Some fans have a dedicated supply system for cooling air.

## Fully certified low voltage motor range up to 560 kW

### Direct on line (DOL) applications

Frame sizes	80 to 400
Output range	0.55 to 560 kW
Number of poles	2-pole up to 250 size, 4-12 pole up to 400 size single- or two-speed
Frame material	Aluminum or cast iron
Mounting	Vertical mounting on request. Pad-mounting available from 280 size and above.

### Variable speed (VSD) applications

Frame sizes	80 to 400
Output range	0.55 to 560 kW
Number of poles	4-12 pole
Frame material	Aluminum or cast iron
Network voltages	Up to 690 V
Frequency	Variable speed range up to 1800 r/min
Mounting	Vertical mounting on request. Pad-mounting available from 280 size and above.

### Test procedure

Two methods are used when testing:

- Combined testing – the motor is tested in combination with a fan with specified characteristics
- The motor is loaded with a generator; the permissible load of the motor at high temperature is defined by the certificate.

### Unclassified test results

The following test results for ABB's smoke venting motors are not classified according to EU decision 27.08.2003, however the test has been carried out according to EN 12101-3:

250°C – 2 hours  
300°C – 2 hours

# Standards and certification

The introduction of the new European Standard, EN 12101-3, (Smoke and Heat Control Systems - Part 3: Specification for powered smoke and heat exhaust ventilators) determines the safety requirements to be fulfilled by motors intended for ventilation systems in closed or underground public spaces and is designed to help protect life and property in the event of fire. The standard became mandatory in new installations from April 1, 2005 (Official Journal of the European Union 17.3.2004). The standard specifies the requirements and test methods for ventilators and motors for use in a powered smoke and heat exhaust ventilation system.

ABB's smoke venting motors comply with the European standard. They are designed to offer maximum performance for venting applications in both normal operation and emergency conditions and have dual purpose certification.

**EXTENSION OF TEST REPORT N°99005234 DATED 07/06/1999.**

**Report N° 99005234:**  
Extension report issued on 7/6/1999 to motors range denominated "M3AAW 90-250 y MBT 200-250", from ABB Motors, S.A.

**Product:**  
Three phases squirrel cage asynchronous low voltage motors with shaft height between 90 to 250 mm.

**Nominal electrical characteristics:**  
Feeding through a three phase electrical network of frequencies 50/60 Hz, maximum 700 V.  
Outputs up to 55 kW at 50 Hz or 63 kW at 60 Hz.  
Speeds lower than or equal to 3600 r/min.  
Maximum allowable temperature rise, in class B, must be lower than or equal to 80 K.  
The motors can be fed by frequency converters within a maximum ambient temperature of 40 °C. In case of accident, with an increase of the ambient temperature, the motor should be fed by an industrial sinusoidal network.

**Construction characteristics.**  
Motors with Al frames and cast iron end shields  
Degree of protection IP55  
Insulation class F  
Motor without fan IC418  
Bearings greased for life with grease Barrierta L55/2

At the date of this report, LGAI owns the ENAC accreditation to run according to EN 12101-3 July 2001.

This document will not be reproduced otherwise than in full.  
This document consists of 3 pages, of which – from annexes.

**Classification of products**

Class	Temperature (°C)	Minimum function duration (min)
F200	200°C	120
F300	300°C	60
F400	400°C	120

EN 12101-3, February 2002:

**FIRE TEST OF BUILDING ELEMENTS**  
According to the European standard NF EN 12101-3: 2002-09  
and the French Decree dated of August 3rd /1999

**CERTIFICATE OF APPROVAL**

**Subject:** Fire tests of a range of electrical motors Ref. M3B/PW

**Tests n°:** 04 - H - 081      Carried out on : March 1<sup>st</sup>, 2004  
04 - H - 086      March 2<sup>nd</sup>, 2004  
04 - G - 082      March 3<sup>rd</sup>, 2004

**Report n°:** 04 - G - 082

**Sponsor:** ABB OY, ELECTRICAL MACHINES LV MOTORS  
Strömbergs Puistola 5A  
FIN - 65101 VAASA

**Scope:** A range of electrical motors of low-voltage, three-phase, asynchronous, closed cage electric motors with the following features :

- manufacturer : ABB OY, ELECTRICAL MACHINES LV MOTORS
- reference : M3B/PW
- construction : TEC
- frame size : from 160 up to 400
- electrical ratings up to 560 kW
- nominal rated voltages supply between 190 V and 490 V
- rotational speeds : from 4 up to 12 poles and multi speeds motors
- insulation class/temperature rise class/specifications : H7-B/EN 60034-1
- frame and end covers material : cast iron
- cooling fan material : aluminum (plastic fan allowed)
- fan cover : steel
- applications : DOL and VSD (maximal rotational speed 1800 rpm/min)
- Maximal frequency equal to 60 Hz for both application

Bearings features for frame size motors from 160 mm up to 400 mm :

- bearing type / arrangement / class of fit / lubricant DE : ball bearing regreasable / locked bearing / C4 / JUNIREX N2 (ESSO)
- bearing type / arrangement / class of fit / lubricant NDE : ball bearing regreasable / free bearing / C4 / UNIREX N2 (ESSO)

**Test procedure:** These motors were tested according to the Annex D, in association with a generator, with a dynamic load calculated according to ISO 281 and defined in the technical file of manufacturer. The dimensioning of the motors took into consideration axial and radial loads, the tests had been performed with a corresponding radial load.

**Conclusions:**

OPERATING TEMPERATURE	: FOUR HUNDRED DEGREES CELSIUS (400° C)
OPERATING TIME	: ONE HUNDRED AND TWENTY MINUTES (120 min)
TEMPERATURE CLASS/TIME	: F 400 (120)
APPLICATION CLASS	: DUAL PURPOSE

Matzérières-lès-Metz, France, July 15<sup>th</sup>, 2004

# Mechanical design

## Design

The design utilizes the same durable structure as for process performance motors, meeting the toughest demands from of todays process industry. These motors

use the best materials and constructions methods to achieve the highest quality and reliability. The motor design is also highly adaptable to allow rapid engineering solutions according to customer's specifications.

## Bearings

Motors are normally fitted with single-row deep groove ball bearings as listed below.

Axial and radial load should be checked with ABB.

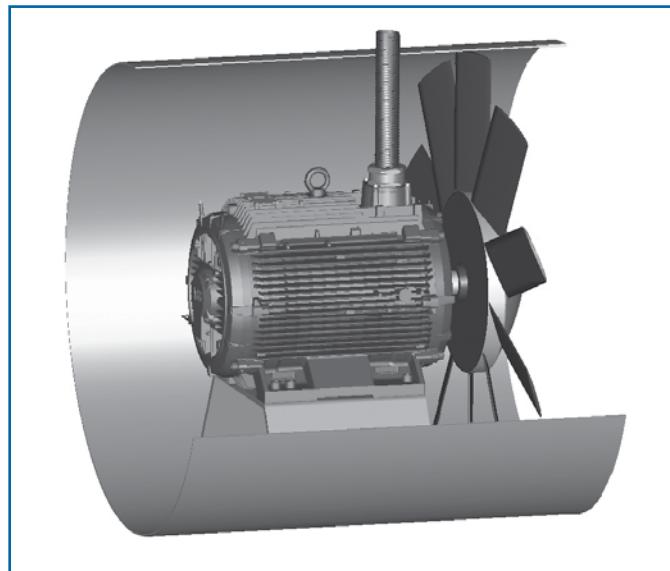

Motor size	Number of poles	Foot- and flange-mounted motor	
		D-end	N-end
<b>M3QAW 80</b>	2-8	6204-2Z/C3	6204-2Z/C3

## Cooling

Smoke venting motors are as standard equipped with it's own cooling fan mounted on the shaft at non-drive end.

Smoke venting motors are, however, often mounted in the airstream inside the ventilation duct, hence can the airstream be utilized to cool the motor. The motor can then supplied without an own fan and fancover. When utilizing this design is it the fan manufacturers responsibility to ensure that cooling is as efficient as it is with the motor's own cooling fan and that there no obstacles or shields that prevents the airflow around the motor.

Example of a motor without cooling fan.

# Design with terminal box or with flying leads

## Terminal box

### Sizes 90-180, aluminum frame

The terminal box is made of aluminum alloy and is located on top of the stator. The lower part of the box is integrated with the stator. It is provided with 2 knockout openings on each side. Sizes 160-180 also have a third smaller opening. Cable glands are not included.

### Sizes 200-250, aluminum frame

The terminal box and cover are made of deep drawn steel and mounted on top of the stator. The box is bolted to the stator and is not rotatable. The terminal box is provided with two flange openings, one on each side. On delivery the holes are sealed with plastic plugs. Cable glands are not included.

### Sizes 80-132, cast iron frame

The cable entries are tapped in the terminal box frame. Cable glands are not included.

### Sizes 280-400, cast iron frame

The terminal box is equipped with cable glands or cable boxes, see catalogue Process performance motors for standard delivery. Motors for 400°C are always equipped with flying leads and come without terminal box.

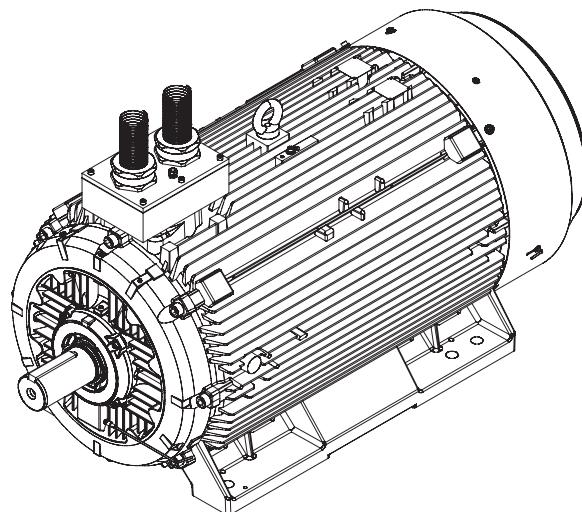

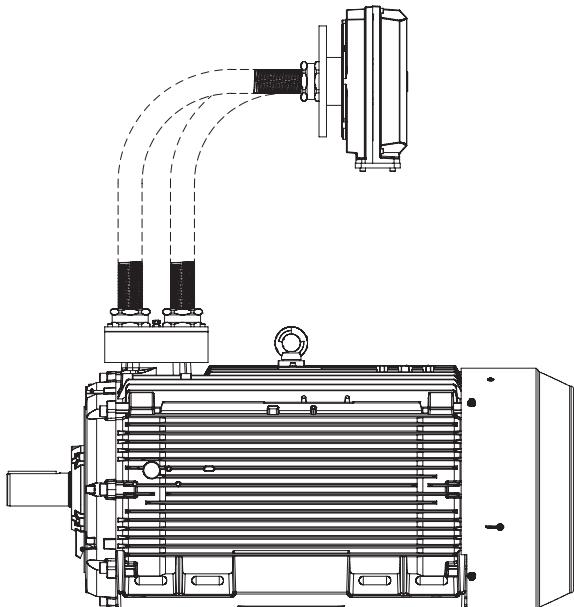

## Design with flying leads

Smoke Venting motors from size 280 and above are equipped with the flying leads as a standard. Unless otherwise specified, the length of the flying leads is two meters. Protection class of standard flying leads construction is IP40. However the protection class of the motor frame is IP55 due to sealing of cable entry. On request can the flying leads be equipped with a terminal box.

Smoke venting motors with terminal box mounted on frame for classes F200, F250 and F300 on request.

Frame size	Length of flying leads	Size of cable glands
280	3 m	M63
315	3 m	3"
355	3 m	1-2x3"
400	3 m	2x3"

## Examples

# Optimized for variable speed applications

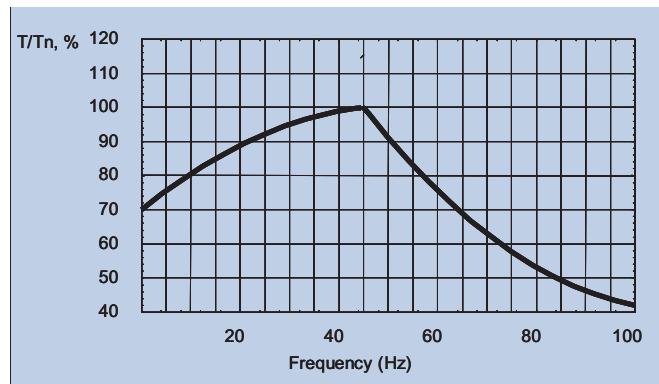

The basic structure of motor sizes 280 - 400 is as standard optimized for variable speed applications. Please see product catalogue BU/Process performance motors GB 03-2005 for details.

In the event of an accident motors up to frame size 250 should be connected to industrial (sinusoidal) net.

## Motor loadability with ACS 600/800 frequency converter

Motor sizes 280 and above are equipped with reinforced insulation and insulated N-bearing.

Motor size		
Voltage	$\geq$ IEC 280	$P_N \geq 350$ kW or $\geq$ IEC 400
$U_N \leq 600$ V		- common mode filter
$U_N \leq 690$ V	- dU/dt filter	- dU/dt filter - common mode filter

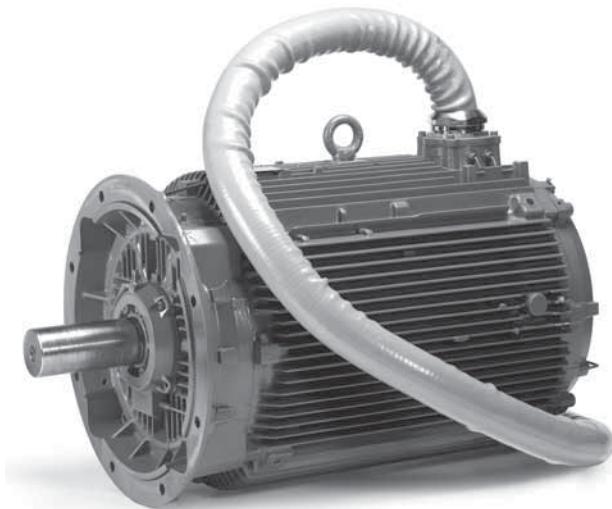

## Air ratings

Smoke venting motors are often mounted in the airstream inside the ventilation duct, hence the airstream can be utilized to cool the motor, which can then be supplied without its own fan or fancover.

Due to the high air flow and speed from the fan the motor rating can be increased, while still maintaining the normal temperature rise limitations.

Values in the technical data pages on the following pages are calculated with cooling fan in the motor. Values for air ratings are available from ABB on request.

*Example of cast iron motor size 315 with flying leads.*

# Ordering information

When placing an order, please state the following minimum data in the order, as in the example.

The product code of the motor is composed in accordance with the following example.

Type designation	M3AAW 200 MLA
Pole number	4
Mounting arrangement (IM-code)	IM B3 (IM 1001)
Rated output	30 kW
Product code	202 001-ADE
Axial and radial load and directions.	
Variant codes acc. to needs	

## Motor size

A	B	C	D, E, F, G	
M3AAW	112 M	3GAA 202 001 - ADE, 173, 450, etc.		
		1 2 3 4 5 6 7 8 9 10 11 12 13 14 15		

- A Motor type
- B Motor size
- C Product code
- D Code for mounting arrangement
- E Voltage and frequency code
- F Generation code followed by variant codes

## Explanation of the product code

### Positions 1 to 4

M3AAW/3GAA =	Totally enclosed motor with aluminum stator frame
M3QAW/3GQA =	Totally enclosed motor with cast iron stator frame
M3BPW/3GBP =	Totally enclosed motor with cast iron stator frame

### Positions 5 and 6 - IEC size

08 = 80	16 = 160	28 = 280
09 = 90	18 = 180	31 = 315
10 = 100	20 = 200	35 = 355
11 = 112	22 = 225	40 = 400
13 = 132	25 = 250	

### Position 7 - Pole pairs

1 = 2 poles	3 = 6 poles
2 = 4 poles	4 = 8 poles

### Positions 8 to 10 - Running number

### Position 11 - (dash)

### Position 12

#### Mounting arrangement

A =	Foot-mounted motor, top-mounted terminal box
B =	Flange-mounted motor. Large flange with clearance holes.
D =	Pad mounted.
E =	Flange-mounted (CI integral flange)
H =	Foot- and flange-mounted motor, top-mounted terminal box. Large flange with clearance holes.
N =	Flange-mounted (CI ring flange FF)

**Position 13 - Voltage and frequency:** See tables below

**Position 14 - Generation code A, B, C, D, E**

**Position 15 - Variant codes**

The variant codes for defining the smoke venting classification need to be added to the product code; mentioned on each technical data page.

170 Smoke venting specification, 200°C 2 hours.

171 Smoke venting specification, 300°C 1/2 hours.

173 Smoke venting specification, 200°C 2 hours, VSD use, Class F200 according to EN 12101-3.

386 Smoke venting specification, 200°C 2 hours, VSD use, Class F200 according to EN 12101-3.

392 Smoke venting specification, 250°C 2 hours, DOL use, Class T250 according to French decree 03-08-1999.

393 Smoke venting specification, 250°C 2 hours, VSD use, Class T250 according to French decree 03-08-1999.

172 Smoke venting specification, 300°C 1 hour, DOL use, Class F300 according to EN 12101-3.

387 Smoke venting specification, 300°C 1 hour, VSD use, Class F300 according to EN 12101-3.

174 Smoke venting specification, 400°C 2 hours, DOL use, Class F400 according to EN 12101-3.

389 Smoke venting specification, 400°C 2 hours, VSD use, class F400 according to EN 12101-3.

## Code letters for supplementing the product code - Code letter for voltage and frequency

Motor size	Direct start or, with Δ-connection, also Y/Δ-start

The two bullet points in the product code indicate choice of mounting arrangement, voltage and frequency, see ordering information page.

<sup>1)</sup> When ordering please add the following variant code to the product code:

Sizes 90-100: 170 Smoke venting specification, 200°C 2 hours.

Sizes 112-400: 173 Smoke venting specification, 200°C 2 hours, DOL use, Class F200 according to EN 12101-3.

386 Smoke venting specification, 200°C 2 hours, VSD use, Class F200 according to EN 12101-3.

Includes insulated bearing at N-end.

<sup>2)</sup> On request.

# LV Smoke venting motors 200°C 2 hours

Technical data for totally enclosed squirrel cage three phase motors, aluminum or cast iron frame

IP 55, IC 411; Sizes 90-250: Insulation class F, temperature rise class B

Sizes 280-400: Insulation class H, temperature rise class B

The two bullet points in the product code indicate choice of mounting arrangement, voltage and frequency, see ordering information page.

<sup>1)</sup> When ordering please add the following variant code to the product code:

Sizes 90-100: 170 Smoke venting specification, 200°C 2 hours.

Sizes 112-400: Smoke venting specification, 200°C 2 hours, DOL use, Class F200 according to EN 12101-3.

386 Smoke venting specification, 200°C 2 hours, VSD use, Class F200 according to EN 12101-3.

Includes insulated bearing at N-end.

<sup>2)</sup> On request.

The two bullet points in the product code indicate choice of mounting arrangement, voltage and frequency, see ordering information page.

<sup>1)</sup> When ordering please add the following variant code to the product code:

392 Smoke venting specification, 250°C 2 hours, DOL use, Class T250 according to French decree 03-08-1999.

393 Smoke venting specification, 250°C 2 hours, VSD use, Class T250 according to French decree 03-08-1999.

Includes insulated bearing at N-end.

<sup>2)</sup> On request.

The two bullet points in the product code indicate choice of mounting arrangement, voltage and frequency, see ordering information page.

<sup>1)</sup> When ordering please add the following variant code to the product code:

172 Smoke venting specification, 300°C 1 hour, DOL use, Class F300 according to EN 12101-3.

387 Smoke venting specification, 300°C 1 hour, VSD use, Class F300 according to EN 12101-3.

Includes insulated bearing at N-end.

<sup>2)</sup> On request.

The two bullet points in the product code indicate choice of mounting arrangement, voltage and frequency, see ordering information page.

- 1) When ordering please add the following variant code to the product code:
  - 174 Smoke venting specification, 400°C 2 hours, DOL use, Class F400 according to EN 12101-3.
  - 389 Smoke venting specification, 400°C 2 hours, VSD use, Class F400 according to EN 12101-3.  
Includes insulated bearing at N-end.
- 2) For sizes 80 - 132 without fan, use product code 3GQA \*\*\* \*0\*-\*\*B

The two bullet points in the product code indicate choice of mounting arrangement,  
voltage and frequency, see ordering information page.

1) When ordering please add the following variant code to the product code:

174 Smoke venting specification, 400°C 2 hours, DOL use, Class F400 according to EN 12101-3.

389 Smoke venting specification, 400°C 2 hours, VSD use, Class F400 according to EN 12101-3.

Includes insulated bearing at N-end.

2) For sizes 80 - 132 without fan, use product code 3GQA \*\*\* \*0\*-\*\*B

3) On request.

The two bullet points in the product code indicate choice of mounting arrangement, voltage and frequency, see ordering information page.

<sup>1)</sup> When ordering please add the following variant code to the product code:

174 Smoke venting specification, 400°C 2 hours, DOL use, Class F400 according to EN 12101-3.

389 Smoke venting specification, 400°C 2 hours, VSD use, Class F400 according to EN 12101-3.

Includes insulated bearing at N-end.

<sup>2)</sup> For sizes 80 - 132 without fan, use product code 3GQA \*\*\* \*0\*-\*\*B

<sup>3)</sup> On request.

# LV Smoke venting motors 400°C 2 hours

Technical data for totally enclosed squirrel cage  
three phase motors, aluminum or cast iron frame

IP 55, IC 411; Sizes 90-250: Insulation class H, temperature rise class B

Sizes 280-400: Insulation class H, temperature rise class F, class B on request

<sup>1)</sup> When ordering please add the following variant code to the product code:

174 Smoke venting specification, 400°C 2 hours, DOL use, Class F400 according to EN 12101-3.

389 Smoke venting specification, 400°C 2 hours, VSD use, Class F400 according to EN 12101-3.

Includes insulated bearing at N-end.

<sup>2)</sup> For sizes 80 - 132 without fan, use product code 3GQA \*\*\* \*0\*-\*\*B

<sup>3)</sup> On request.

# Smoke venting motors - Variant codes

Code	Variant 1)	Motor size					
		80- 100	112- 132	160- 180	200- 250	280- 315	355- 400
<b>Balancing</b>							
052	Balancing to Grade A (IEC 60034-14).	S	S	S	S	S	S
417	Balancing to Grade B (IEC 60034-14).	P	P	P	P	P	P
423	Balanced without key.	P	P	P	P	P	P
424	Full key balancing.	P	P	P	P	P	P
<b>Bearings and lubrication</b>							
036	Transport lock for bearings.	M	M	M	M	P	P
041	Bearings regreasable via grease nipples.	NA	M	M	S	S	S
043	SPM nipples. Frame sizes 112-132 only foot-mounted B3.	R	M	M	M	S	S
058	Angular contact ball bearing at D-end, shaft force away from bearing.	NA	NA	NA	NA	R	R
060	Angular contact bearing at D-end, shaft force towards bearing.	NA	NA	NA	NA	R	R
107	Bearing mounted PT100 resistance elements.	R	R	R	R	P	P
194	2Z-bearings greased for life at both ends.	S	S	S	S	NA	NA
420	Bearing mounted PTC thermistors.	R	R	R	R	P	P
796	Grease nipples JIS B 1575 PT 1/8 Type A.	NA	NA	NA	NA	P	P
797	Stainless steel SPM nipples.	R	R	R	R	P	P
798	Stainless steel grease nipples.	R	R	R	R	P	P
<b>Branch standard designs</b>							
170	Smoke venting specification, 200°C 2 hours.	P	P	P	P	NA	NA
171	Smoke venting specification, 300°C 1/2 hours.	P	P	P	P	NA	NA
172	Smoke venting specification, 300°C 1 hour, DOL use, Class F300 according to EN 12101-3.	P	P	P	P	P	P
173	Smoke venting specification, 200°C 2 hours, DOL use, Class F200 according to EN 12101-3.	P	P	P	P	P	P
174	Smoke venting specification, 400°C 2 hours, DOL use, Class F400 according to EN 12101-3.	P	P	P	P	P	P
386	Smoke venting specification, 200°C 2 hours, VSD use, Class F200 according to EN 12101-3.	R	R	R	R	P	P
387	Smoke venting specification, 300°C 1 hour, VSD use, Class F300 according to EN 12101-3.	NA	NA	NA	NA	P	P
389	Smoke venting specification, 400°C 2 hours, VSD use, Class F400 according to EN 12101-3.	NA	NA	NA	NA	P	P
392	Smoke venting specification, 250°C 2 hours, DOL use, Class T250 according to French decret 3-08-1999.	NA	NA	NA	NA	P	P
393	Smoke venting specification, 250°C 2 hours, VSD use, Class T250 according to French decret 3-08-1999.	NA	NA	NA	NA	P	P
142	"Manilla" winding connection. (440 VΔ series, 220 VΔ parallel, 60 Hz).	P	P	P	P	R	R
178	Stainless steel/acid proof bolts.	M	M	M	M	P	P
209	Non-standard voltage or frequency (special winding).	P	P	P	P	P	P
425	Corrosion protected stator and rotor core.	P	P	R	R	P	P
785	Reinforced tropicalisation.	NA	R	R	R	NA	NA
<b>Cooling system</b>							
068	Metal fan.	M	M	M	M	P	P
075	Cooling method IC 418 (without fan).	P	R	R	R	R	R
790	Cast iron fan cover.	NA	NA	NA	NA	P	NA

<sup>1)</sup> Certain variant codes cannot be used simultaneously.

S = Included as standard.

M = On modification of a stocked motor or on new manufacture,  
the number per order may be limited.

R = On request.

P = New production only.  
NA = Not applicable.

Code	Variant 1)	Motor size					
		80- 100	112- 132	160- 180	200- 250	280- 315	355- 400
791	Stainless steel fan cover.	NA	NA	NA	NA	P	P
<b>Coupling</b>

# ABB Motors' total product offer

ABB offers several comprehensive ranges of AC motors and generators. We manufacture synchronous motors for even the most demanding applications, and a full range of low and high voltage induction motors. Our in-depth knowledge of virtually every type of industrial processing ensures we always specify the best solution for your needs.

## Low voltage motors and generators

### General purpose motors for standard applications

- Aluminum motors
- Steel motors
- Cast iron motors
- Open drip proof motors
- Global motors
- Brake motors
- Single phase motors

### Process performance motors for more demanding applications

- Aluminum motors
- Cast iron motors
- Motors for high ambient temperatures

### NEMA motors

### Motors for hazardous areas

- Flameproof motors
- Increased safety motors
- Non-sparking motors
- Dust ignition proof motors

### Marine motors

- Aluminum motors
- Steel motors
- Cast iron motors
- Open drip proof motors

### Other applications

- Permanent magnet motors
- High speed motors
- Wind turbine generators
- Smoke venting motors
- Water cooled motors
- Motors for roller table drives

## High voltage and synchronous motors and generators

- High voltage cast iron motors
- Induction modular motors
- Slip ring motors
- Motors for hazardous areas
- Servomotors
- Synchronous motors and generators
- DC motors and generators

ABB ([www.abb.com](http://www.abb.com)) is a leader in power and automation technologies that enable utility and industry customers to improve performance while lowering environmental impacts. The ABB Group of companies operates in around 100 countries and employs about 105,000 people.
